

Scope recruits Svante Andreen as new partner

The growth investor Scope continues to increase its investment capacity and recruits Svante Andreen as new partner. Svante Andreen has a background in investment banking. He has previously worked for Goldman Sachs in London, Frankfurt and Stockholm and as Head of Corporate Finance and Debt Capital Markets at Handelsbanken.

The recruitment of Svante Andreen is a part of Scope's ambition to increase its investment rate.

- Scope has established a solid platform as a growth investor and is now entering a new phase. For some time, we have worked to expand the team in an effort to take advantage of potential investment opportunities. We have known Svante Andreen for a long time, and given his strong background and ambition he is a dream recruitment that further will strengthen Scope's growth ambitions, says Mikael Kamras, Senior Partner at Scope.
- Scope has an investment strategy that stands out from most other private equity companies and that has proven successful. Scope's potential is significant. It will be a great challenge working in the intellectual, international and growth focused environment that Scope is offering, says Svante Andreen.
